System & Storage Setup

Configure your storage engine, Google Drive integration modes, dedicated folder names, and firm branding.

 Clean Fresh Start

1. SELECT STORAGE & GOOGLE DRIVE INTEGRATION MODE

Backup And Client

Full Cloud Integration: Google Drive handles both Office Backups & Read-Only Client Portals.

Only Client

Google Drive used exclusively for Client Portals; internal Office files stored on Local disk.

Only Backup

Google Drive used for Office Cloud Backups only; No Client Document Portals.

Disable Google Drive

100% Offline / Local Storage only. All office files and PDF passes stored locally.

2. FOLDER NAMES & STORAGE LOCATIONS

Google Drive Root Folder Name

Top-level parent directory in Google Drive cloud.

Office Folder Name

Folder name for internal office files & backups.

Client Portal Folder Name

Folder name managed via Google Drive API for client portals.

Local Storage Root Folder

Primary local disk location for office files and Client Access Link PDFs.

Google Drive Synced Root Path (G: Drive)

Local mirror path for instant G: drive disk speed saving.

Active Structure Preview (Backup And Client):

- └─  Local Storage [D:\App trial]
 - | └─  Office/ (Internal Office Files)
 - | └─  Client Access Links/ (Document Access Passes)
 - └─  Google Drive [G:\My Drive\VS Database\AppData]
 - └─  Office/ (Synced Office Files & Backups)
